TOURISM

GENERAL FEATURES

To help dealers and vendors who work with batteries, LivEN continuously transfers to its customers all the benefits from its advanced battery developments.

LivEN Battery offer provides new fitment advantages and saves on labour through newly developed features such as HVR® (high vibration resistance) and Maintenance Free technology.

Selecting the right LivEN battery for each commercial vehicle means much simpler handling and extended shelf and service life. These benefits increase everyone's value for money distributors, installers and end-users.

HEAVY VEHICLES

GENERAL FEATURES

As battery life duration is strongly affected by the conditions of its use, LivEN Battery presents a heavy battery offer aimed to cover all the energy needs of the professional user.

High electrical equipment on a vehicle, long distance driving, rough environment or extreme temperatures, will mean it has higher energy drain requirements.

By choosing the right LivEN battery for the vehicle's energy requirements, its service life will be extended, increasing the value for the money paid and differing potential replacement costs.
